

## Course Description

A hands-on course designed for those responsible for administering, operating, and/or maintaining a Spectra Logic library.

## Format

This is a 1-3 day, instructor-led course held at Spectra Logic corporate facilities in Boulder, CO, USA, or in Bracknell, England, UK.

## Objectives

At the conclusion of this course, students will be able to:

- Identify major library components and their functions
- Navigate the BlueScale user interface, both at the library and remotely via a web browser
- Import, export, and manage media and TeraPacks
- Perform preventive maintenance procedures
- Collect important traces and logs
- Replace select hardware components
